

COVID-19 Coronavirus

Health & Safety Protocol

Today's world has changed, but WestWorld Tours remains committed to traveller safety and providing peace of mind while travelling with us. While covid-19 continues to change our environment, we are doing all that we can to adapt to the new requirements and expectations.

We have introduced enhanced health and safety protocols to keep our guests safe while travelling with us. The well-being of our travellers and our team have always been, and always will be our primary concern.

All persons 12 years of age and older travelling wholly within Canada only with WestWorld Tours, will need to **provide government verifiable proof of fully dosed vaccination or negative PCR or Antigen test** to the Tour Director before joining the tour. The last dose of vaccine must have been administered at least 15 days prior to departure. PCR negative test result or a negative antigen test taken no more than 72 hours prior to departure, with a rapid antigen test retaken every 2-3 days by our certified Tour Director during the duration of the tour. **We are unable to guarantee admittance to all event or attractions on tour if those venues restrict unvaccinated passengers.**

All tours that leave Canada require **proof of a government verifiable double dose vaccine at least 15 days prior to departure**. Travellers also will need to **follow any airline and destination government requirements** which may be different than WestWorld Tours policy.

Get the most up-to-date information from the Government of Canada on travelling in Canada or abroad at travel.gc.ca.

This policy is current as of August 1, 2021 and will be amended as needed as regulations dictate.
